

**Experience the**

**REVOLUTION**

**of 20,000 hours of flexible business use.**

The new projectors from CASIO with a light source's life expectancy of up to 20,000 hours without spare lamps are an ideal professional business partner – from spontaneous meetings in small offices to annual general meetings in large conference halls. Their innovative features make the new projectors flexible companions for your business needs.

**Up to 20,000 hours of operational life.**

The new mercury-free laser- and LED-hybrid light source combines a strong illuminative performance of up to 2,500 ANSI lumens with an extremely long life expectancy of up to 20,000 hours – means approximately 10,000 two-hour presentations.

**Flexibility thanks to USB and WLAN capability.**

The four new USB models make presentations without a PC possible – simply convert your presentation with the software provided and display it per USB stick over the projector. What's more: the projectors can be connected via WLAN up to four Windows® PCs - ideal for presentations with several presenters.

**2 × optical zoom.**

Optimum adjustment of pictures to the size of the projection screen to match characteristics of large and small rooms: the 2 x optical zoom and the automatic keystone correction make this possible. Just press the button and within 4–8 seconds the projectors are switched on or off. After all, time is money.

**Impressive colour rendition.**

The new projectors from CASIO deliver brilliant, clear and expressive images in both classic XGA and wide-screen WXGA resolution (WXGA – 16:10) – even in daylight.

**The revolution at a glance**

- Up to 20,000 hours with up to 2,500 ANSI lumens without changing lamps
- Constant brightness<sup>2</sup>
- Mercury-free illumination technology
- Power consumption less than one watt in standby mode
- Brilliant and natural colour rendition
- 2 × optical zoom
- HDMI port
- Quick start and stop
- Dimensions (W × D × H): 297 mm × 210 mm × 43 mm

<sup>2</sup>Slight reduction in brightness may be caused by dust etc.

The models of the XJ-A series differ in brightness and resolution as well as in USB and WLAN capability.
